honor the State by placing it with the traitors against the Government—why should they be less infamous evermore than the Tories and Cowboys of our earlier and less dangerous times of

The prime mover in all this conspiracy is Clement L. Vallandigham,-Let him pass! Convicted by two courts, banished by the Chief Magistrate of the nation, an appellant from that triother of her citizens ever receivedbranded Traitor by the Rulers, sealed Traitor by the People-let him wander, outcast that he is, with the mark minish, till the grave shall swallow, his infamy.

Ohio has had Sons whom she deher Senatorial bays, or chosen to stand and speak for her among the Representatives of the Nation. How had this foul rottenness festered in the State, that it could reach these men and blight them forever? In a movexation at private grievances, or groveling fealty to party marhinery by which they hoped to rise, or unmanly fear of party drill to conquer their consciences and their honor; and the horror of all who took honest pride in their fair names, they fell to be the seconds and adherents of the malevolent outcast. It is a hard fate for men who might have had large futures before them; but stern justice demands that henceforth to each one who loves the honor of his State, their namesthey to rise all lips, we need not call them over-be held infamous forever-

There can be, there must be no esmasses there may be many excuses; for the deceiving leaders none. To have been a Tory in the Revolution will seem a light thing, in the years that come, beside having been a Vallandigham leader in the Great Rebel-

CONVERSATION.

Among all the "accomplishments" which our young ladies expect to acquire, is to be regretted that the art of conversation is not included. No grace of person or manner can compensate for the lack of this. In youth, the conversation of our women is too apt to be trifling and insipid, and in middle age is too often confined to complaints of health and the scandal of the day .-Lively conversation, upon instructive and elevating topics, is but little practiced; but, wherever it is found it gives a charm to the society of women which nothing else can. It triumphs over deformity and old age, makes ugliness itself agreeable. Curran, speaking of Madame de Stael, who was by no means handsome, but a splendid conversationalist, said that she had "that power of talking herself into a beauty." Ladies should think of this. Beauty lies in other things than fine features and cosmetics.
